# THE STEEL DETAILER 2016

# SolidWorks 2016

# INSTALLATION PROCEDURE

Date	Revision	Description
20/08/2016	В	INITIAL ISSUE

Installation options

- 1. 1 Desktop PC Installation
- 2. EPDM installation or Existing SQL Installed
- 3. TSD Trial Library Installation

### 1. 1 Desktop PC Installation

The Steel Detailer has a backend SQL Database to store Projects, Libraries and Project Data. This database is the key behind The Steel Detailer for sourcing the model data without having it loaded.

The Steel Detailer as a prerequisite will ask to install Microsoft SQL 2014 Express, which is a free product. This must be installed to place The Steel Detailers database. The following Steps will show you how to do this.

**Please turn off your Anti-Virus** software during the installation process to prevent any installation errors.

#### STEP 1

Right mouse click the File after downloaded 'The Steel Detailer 2016.exe and select Run as administrator.

STEP 2 Click Yes

Set the role Membership settings as shown.

Select OK.

If you cannot set this, please ask your administrator to set this for you.

#### STEP 12

Test the settings by disconnecting from SQL and connecting to the TSD Login

#### TSD thesteeldetailer

If everything works and you are able to connect to SQL using the TSD Login credentials then your TSD database ready.

If you cannot connect, you will have to ensure that you have followed the process completely.

You will need to also setup the SQL server similar to Option 1 settings.

Please do not confuse the 'sa' account details with the TSD account settings, they are different.
